## Creator 6.5.x Gather For Output Stalls

**Created**  
04/08/2003

### Issue

**Product**  
Creator 6

Gather for Output stalls if one or more network volumes are mounted when running under OS 9.

**Platforms**  
OS 9.x

### Solution

1. Unmount all network volumes.
2. Open the ColorSync Handler OS9 script from the Scripts Folder that is in the MultiAd Creator Add-Ons folder.
3. Remove the space between “MultiAd” and “Creator” in the line that begins with “tell application”.
4. Click the Check Syntax button.
5. When asked to locate the application, navigate to your MultiAd Creator folder and choose the MultiAd Creator application.
6. Save and close the script.
