

Read About the MultiAd Creator 6.0.5 Updater (Windows)

February 6, 2002

Updating Instructions

1. Download the Creator 6.0.5 Updater by clicking the "Download Update for PC" link.
2. Choose "Save this program to disk," click OK, and specify a location for the updater.
3. Double-click "605update.exe" when it appears in the location you specified.
4. In the "Select a File to Update" window, do one of the following:
 - If MultiAd Creator.exe appears in the window, click Update. (If more than one MultiAd Creator.exe appears in the window, select the one you wish to update and click Update.)
 - If MultiAd Creator.exe does not appear in the window, click Select File. Then navigate until you find it, and click OK. Next, click Update.
5. After the application is successfully updated, click OK.

Version 6.0.5 Improvements

- Improved stability (many bugs fixed)
- Faster in some areas
- Compatible with a wider range of printers
- Smaller PDF files
- Overflowed text is signified by three red dots in inactive text blocks.
- Quick Open menu (File > Quick Open)
